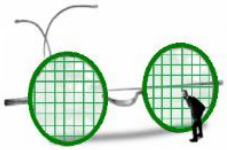
bancrap

HIGH LEVEL SUMMARY

NEW!!! "Sustainable business"

bancrap introduces a new profitable and sustainable movement of *"the Green data revolution"*.

bancrap serves a new optimized messaging logic in concentrating individuals data and stuff in **multi profitable** and **green** ways.



This is bancrap!

bancrap is an aggregated web-application **banning crap** serving:

1. *Targeted marketing space*
2. *Procurement of wanted goods/services*
3. *Marketplace for Stuff, Collateral*
4. *Search engine for accurate statistics*

bancrap profitably and **green** optimizes messaging and aggregating of data for **individuals** and **corporations**. **bancrap** prepares businesses for the coming change towards business focused on **Quality** and **Origin labeling** instead of quantity based **crap** business.

How it works!

***Individuals** store personal data in a **secure** web - matrix:*

Features 1 and 4:
Pinpointed and targeted marketing and statistics

Feature 2:
Supply members procurement services

Feature 3:
A large market and collateral space packed with peoples stuff

The more a member hooks up her friends and supply data the more monetary incentives she receives and also not the least in going **green** and **earning the BUCKS**.

Sign up as an investor!!!

The future of business is changing in to all sustainable angles and ways and **bancrap** is one of these new businesses.

Being an investor in **bancrap** you will profit vastly in the long run. The market for **bancrap**:s activities are both local and global in helping individuals in their relations with suppliers. Corporations secure their business and yields in trading sustainable with optimized long lasting relations and enhancing **Greener trademarks** towards customers in the ongoing green transformation of business.
